DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 30 November 2005 has been entered.

Response to Arguments

Applicant's amendments changed the scope of the independent claims significantly; therefore, since the scope of claims has changed over prosecution, restriction is now required as below.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-35, drawn to generating a scene graph from markup language in its native format, classified in class 345, subclass 629.
- II. Claims 36-62, drawn to parsing markup language and converting it other formats for object containers, classified in class 717, subclass 713 or 136.

Inventions Group I and Group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination Group I has

Art Unit: 2672

separate utility such as generating scene graphs from interpreting markup. See MPEP § 806.05(d). Group II has separate utility for parsing markup and translating it to other modes and systems of operations for visual container objects in various modes. While the invention of Group II can be used in conjunction with that of Group I, it has separate utility for parsing and otherwise converting between different programming languages and editing container objects, which is much more properly software development and the like.

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eric Woods whose telephone number is 571-272-7775. The examiner can normally be reached on M-F 7:30-5:00.
